ABSTRACT

In writing your abstract, you should ensure that the following items are captured:

- i. Briefly in a sentence, state your aim and the problem you are addressing.
- ii. Specify the method used in addressing the problem
- iii. Specify the tools used in designing the models
- iv. Specify the IDE used in implementation/simulation
- v. State your findings/results obtained
- vi. Conclude in summary the significance of the results obtained
- vii. State your recommendation based on how your research will benefit the target community.
